Capital Chatter.

Washington, 26.—Among the admissions to practice at the Supreme Court, to-day, was J. H. Slater, of Legrand, Oregon.

The Obilian minister has information from Santiago on the 24th, via Paris, of the serious illness of General Kilpatrick, United States minister, and that physicians feared the case was hopeless. Later news does not mention General Kilpatrick, who is thought therefore no worse.

Washington, 27.—There was some surprise in the Senate that Howe was not nominated to-day for attorney-general. James was nominated as a precaution to avoid any quibble regarding his future official acts. Howe's friends claim that he will be nominated as soon as the President can communicate with him. Others assert that the recent star route complications have convinced the President that MacVeagh ought to remain and conduct the cases and that he will insist on his doing so, or appoint Solicitor General Phillips, attorney-general pro tem, until Congress meets. Folger's nomination was received with approval, but not enthusiasm. It is believed he will make an efficient and safe secretary. One objection urged against Howe by the President's advisers is his age and infirmity. They say the present administration must be vigorous.

A majority of the postoffice committee reported favorably on Stratham, Mahone's friend, for postmaster at Lynburg. The democrats submit an adverse report, and say they will even filibuster to defeat Stratham. As all are anxious to leave the contest will be sharp.

The connection of Howe's son-in-law, Totten, with the defense of the star route cases is the chief reason of Howe's unwillingness to accept the attorney-generalship, but the President's friends say it does not figure with him. Howe's ultimate appointment is regarded as probable.

The President has informed the senators that they can adjourn to-morrow, as he has only a few more nominations.

Ramsdell has been nominated register of wills. It was supposed that Webster, whom Grant backed and whom Ramsdell supplanted, would get the place.

The only thing urged against Folger's confirmation was that he had a claim against government for compensation while assistant treasurer at New York. It being learned that this claim was settled he was confirmed.

New York, 27.—Commercial's Washington: Emory Storrs, of Chicago, is said to have been tendered and accepted the attorney-generalship with the understanding that he will serve only in the star route prosecutions and until December 1st.

Blaine's Letter.

New York, 27.—The Tribune on the London Times' article: While Blaine's declaration is entirely satisfactory to the American people, it is evident that emergencies may arise in which we must be prepared to back it up by force or by that compulsion which nations sometimes and sufficient without resorting to acts of war. Our position is in effect not unlike that of Gortchakoff, when in '71 he partly annulled the treaty of Paris. The powers were restive under the change, but they had to acquiesce.

The World: The London Times is not, of course, the organ of the British government, but it is just as well that no time should be lost in making it clearly understood that the United States do not propose to recognize the pretensions of any European power arising out of the colonial relations of the power as of equal value with our own voice in matters virtually affecting the present and future of the commerce and industry in the new world.

Question for Navigators.

New York, 27.—The Herald says of the recent voyage of the ship MacMillan, from Antwerp to San Diego, California, that it is certainly novel for vessels bound from the English Channel to California ports, but the experiment suggests an important problem for navigators when making a winter passage. The distance from England to California by the Cape of Good Hope is far more than by Cape Horn, but the perils of a Cape Horn passage and its notorious uncertainties and attendant delays, may upon mature re-investigation make the route recently tried by Gray preferable for sailing ships, at least in the southern winter. By the Cape Horn route every mile of longitude the ship makes (about 120° before reaching our Pacific coast) except while crossing the trade wind belts, she must make in the face of adverse westerly winds, whereas by the eastward route these winds are almost ceaselessly in her favor, as the fine voyage and speed made by the MacMillan (170 miles per day) illustrated.

A Swindling Failure.

San Francisco, 27.—Tucson dispatch: Considerable feeling exists against the suspended firm of Lord & Williams, for it received deposits up to the hour of closing on Tuesday night. Several thousands were so taken. The low to depositors is principally among raising men, and no other firms are affected by the failure. The Bank of California has secured some 6,000 cords of wood to offset is less of \$60,000, but there is a question as to the title. The recent judgment taken by default in New York in favor of C. Preston, of this city, for \$250,000, although set aside, affected the credit of the firm.

Arthur's Promises.

New York, 27.—Herald's Washington: Governor Foster, of Ohio, who has had two interviews with the President, says he was favorably impressed with his manner, but more favorably with the remark that during his term of office he would know no faction in the republican party; that he hoped for the cordial and constant support of every friend of the party to the end that it might be free from schisms and discord.
